

MATERIAL PRESENTATION REFLECTION LOG

BASIC INFORMATION			
Adult Learner's Name	Tredoux Willemse	Cohort Group	PreK 4
Material Presented	Pouring Liquids	Area	Practical Life
Length of Presentation	15min	Date	09/15/2024

MATERIAL PRESENTED	
The name and age of the child receiving the presentation	Various children ages 2.5 - 4 years
Why do you think the child is ready for the presentation of this material?	This is an introductory practical life exercise. Children are ready when they can sit and observe a demonstration and show interest in working with water.
What is the purpose of the presentation?	To teach children to pour liquid from one container to another, develop hand-eye coordination and concentration, and prepare for independence in daily tasks like pouring drinks.
Did the child perform as you expected during the presentation? Why?	Yes. Children typically spill on first attempts which is normal and expected. They show fascination with the water and want to repeat the activity multiple times. The key is not intervening too quickly and letting them work through spills independently using the sponge.
What did you find successful in the presentation? What needs to be improved?	Successful: Using colored water makes spills easy to see. Small pitcher size (150ml) works well for little hands. Children love this activity and choose it repeatedly. Needs improvement: Must demonstrate very slowly - I sometimes pour too fast. Need to ensure pitchers are appropriately sized for each child's hand.
What will you present to the	Dry pouring (rice or beans), then progress to pouring with funnels, and eventually pouring into multiple small cups.
