PRINT RULES

1. One scale for everything — every actor must sit on or in every place.

2. Nothing under 35 mm in any direction. The youngest children are two.

3. One colour per object, matte PLA.

4. Every copy from the same file in the same colour — Behind the Screen only works if the two sets are identical.

5. Print the places first: they take longest, and they let you check the actors fit before committing to four cats.
