Next work in each area

● Table Setting	Practical Life
● Geometric Solids	Sensorial
● Stamp Game	Mathematics
● Moveable Alphabet	Language
● Parts of a Plant	Cultural

Presented when the child shows readiness — never on a fixed date.

From the classroom

Selected from 23 observations recorded this period

14 JULY 2026 · SENSORIAL

Mei Lin carried the Knobbed Cylinders to her mat unassisted and worked for eighteen minutes without once looking up. She found two cylinders in the wrong sockets, corrected them herself, and returned the work to the shelf exactly where it belonged.

23 JULY 2026 · PRACTICAL LIFE

After snack she invited a younger child to watch her sweep, naming each step aloud as she went. Her language is becoming the bridge between her own hands and the life of the group.
